PERFECT INTEREST TABLES.

JAN 15 1885

1854 P

PERFECT INTEREST TABLES. Published by SAMUEL J. KELSO, 48 Moffat Building, Detroit, Michigan Price 50 cents. Orders so directed, or to Detroit Publishing Co., will be filled by return mail.

OPINIONS.

A great improvement upon any Interest tables I have ever seen.—[Smith R. Woolley, Expert Accountant.

A decided improvement upon any other Tables of which heretofore I have had knowledge.—[D. A. Waterman, Auditor M. C. R. R. Co.

No hesitation in saying that it excels all others.—[E. J. McKendree, Broker, 120 Griswold street, Detroit.

Very correct and simple.—[F ...gs Bank.

"A good thing"; as compa... ...owe, Superintendent Cincinnati Office D. Appleton & Co., Publishers.

Trusting that you will meet ...orious little book deserves.—[Richard Tregaskis, ex-City Accountant.

Your Tables are excellent. ...y wonder is how we have got along so long a time without it.—[Edward ...nies.

REMARKS BY THE COMPILER.

I think business and professional men will appreciate the care and effort which has been expended on these Tables to save time and irksome brain work. Long practical experience has proved to me that the large, costly voluminous books of Tables are unsuitable for office work, as they usually contain a barren waste of figures, which not one man in a thousand has ever occasion to refer to; yet we have to pay for all this mass of printed paper, and laboriously turn over quires of it to get at those Tables which we really want.

As to the small volumes which have been issued from time to time, there is little to choose between them. All are very objectionable. To obtain interest by their aid it is usually necessary to refer to different pages and to different places on these pages, and make aggregates. This backwoods, antediluvian style of Tables is repulsive to the business man, and many, therefore, make their own computations, and discard Interest Tables altogether.

In the "Perfect Interest Tables" there is not a superfluous figure, and as to ease of reference it is only necessary to make the statement that *Interest on any sum between $1 and $10,000, for any time within a year, at the three rates, 10, 7 and 6 per cent., is found in a space between two parallel horizontal lines, not half an inch apart, and directly opposite the given time.*

I place in your hands, gentlemen, for the trifling sum of 50 cents, the very best work that the business world has ever seen, in this country or any other, on the subject treated.

SAMUEL J. KELSO.

These Tables are unquestionably in the best form for reference of any Tables hitherto offered to the business and professional public. The type employed is remarkably clear and distinct. The vertical lines separating units, tens, hundreds, etc., materially aid the eye in reading off interest, and insure accuracy. The heavy type indicates *Principal* in *Dollars*, the small figures under them *Interest* in *Cents*. To illustrate: Look at the tabular figures opposite 6m. 21d. The interest at 10 per cent on $2 is 11 cents; on $300 is 1675 cents, on $50 is 279 cents, on $9000 is 50250 cents.

The component parts of every possible sum intervening between $1 and $10000 is found in the single horizontal line of heavy figures which will be seen at convenient distances on each page, and directly under them, as shown by the guiding vertical lines, in smaller type, is found the interest at 10, 7 and 6 per cent.

As an example, take the sum of $6349 and read off the interest on it for 6m. 21d. at the three rates:

Under **6000**—33500
300— 1675
40— 223
9— 50
354.48—Interest at 10 per cent.

Under **6000**—23450
300— 1173*
40— 156
9— 35
248.14—Interest at 7 per cent.

Under **6000**—20100
300— 1005
40— 134
9— 30
212.69—Interest at 6 per cent.

*When in any case in taking off tabular interest the final figure is followed by 5 or a larger figure, add one unit to the interest taken off. Thus in the above case the figures under 300 are "1172," but as the next figure is "5," which indicates at least ½ a cent, we call the interest "1173."

To illustrate the facility with which interest is obtained at *any rate per cent.*, let us find the interest at 3¾ per cent on $9762 for 6m. 21d. The rule is: *Use the 10 per cent. Table. Multiply the total cents thus obtained by the given rate, and strike off the last figure of the product before placing the point which divides Dollars from Cents.*

Under **9000**— 50250
700— 3908
60— 335
2— 11
9762— 54504
3¾
163512
40878
204390
204.39—Required interest.

P. S.—If the time exceeds 1 year use the "Year Table" below. Thus the interest on $356 for 3 years at 6 per cent. is:

On **300**—5400
50— 900
6 — 108
Interest on **356**—64.08

YEAR TABLE.
